
RICHTON SCHOOL DISTRICT WELLNESS POLICY

RATIONALE:

The link between health of students and learning is well documented. If children are to be successful in school they cannot be tired, hungry, sick, suffering from drug abuse, or worried that school is an unsafe environment in which they could become a victim of a violent act. It has become apparent that problems such as poor nutrition, lack of physical activity, substance abuse, depression, teen pregnancy, obesity, bullying, and more can adversely affect not only a child's health, but also his or her ability to learn.

And that is precisely why a coordinated approach to school health can make a difference. A coordinated approach to school health improves kid's health and their capacity to learn through the support of families, schools, and communities working together. At its very core, a coordinated approach to school health is about keeping students healthy over time, reinforcing positive healthy behaviors throughout the school day, and making it clear that good health and learning go hand in hand.

GOAL:

All students at Richton School shall possess the knowledge and skills necessary to make healthy choices and promote healthy lifestyles. All staff at Richton School are encouraged to model healthful eating and physical activity as a valuable part of daily life.

To meet this goal, the Richton School adopts this school wellness policy with the following commitments to implementing a coordinated approach to school health. This policy is designed to effectively utilize school and community resources and to equitably serve the needs and interests of all students and staff, taking into consideration differences in culture.
